

October 15, 2018 AATCC Supplement Letter

MODEL: 3LWTW4815FW

Whirlpool washing machine model 3LWTW4815FW meets the alternate laundering parameters listed in Table IIIB of AATCC LP1, Home Laundering: Machine Washing if used as indicated below. Note, Water Level is for the main wash fill level.

**Table IIIB—Alternate Laundering Parameters (Type 5 Efficiency)**

Parameter	Value
Water Level	3.6 kg
Soil Level	Medium
Options	None or NO

For AATCC Normal Cycle:

- Testing must be performed with a 3.6-kg load to ensure specified water level.
- Testing must be performed with Type 1 (100% cotton) ballast\* for specified water level. Note, if test specimens represent a significant portion of the load, water level may vary.
- Select JEANS cycle (equal to Normal)
- Detergent added before adding the load to the basket. Soil Level Settings are Medium, Options are set to none or NO.

For AATCC Delicate Cycle:

MODEL: 4KWTW4815FW

Whirlpool washing machine model 4KWTW4815FW meets the alternate laundering parameters listed in Table IIIB of AATCC LP1, Home Laundering: Machine Washing if used as indicated below. Note, Water Level is for the main wash fill level.

**Table IIIB—Alternate Laundering Parameters**

For AATCC Normal Cycle:

Testing must be performed with a 3.6-kg load to ensure specified water level.

Testing must be performed with Type 1 (100% cotton) ballast\* for specified water level. Note, if test specimens represent a significant portion of the load, water level may vary.

Select JEANS cycle (equal to Normal)
